Seeded Defects Log

Defect Number	Defect	Output before seeding	Output after seeding	Suggested	Severity
1	App displays "Welcome Guest!" for even logged in users.	"Welcome Guest!" for guest users and "Welcome <name>!" for users logged in through Google.	"Welcome Guest!" for all users.	Update session['name'] to user's name after user is logged in through Google.	3
2	The Chef.Ai logo button on the navigation bar does not work.	Redirects to Ingredients page.	Does nothing	Update href to "/ingredients"	3
3	Toggle button works only once for pre-existing recipe.	Returns ML generated recipe if toggle button is on and returns pre-existing recipe if toggle button is off.	After returning ML generating recipe once, any subsequent submissions for the same set of ingredients always returns pre-existing recipe regardless of toggle button value.	Reset the appropriate variables.	2
4	Same ingredients can be submitted in both the search bars (include ingredients and exclude ingredients).	Throws an error if same ingredients are included in both the search bars.	No error message thrown	Check for duplicate elements and throw an error if any are found.	2
5	Team link on the navigation bar does not work.	Redirects to the team page.	Does not do anything	Update href to "/team"	3
6	Sign out does not work	Signs out the user and redirects the user to the login page.	Does not do anything	Reset the onclick method for sign out.	2
7	No Max limit for ingredients entered by the user	Throws an error if more than 10 ingredients entered by the user.	Does not throw an error	Check for number of ingredients entered and throw an error if more than 10	2

8	Incorrect error message for min limit of ingredients	Throws min limit error when less than 3 ingredients are entered.	Throws max limit error.	Update the error message to the min limit error message.	2
9	Auto-complete does not work if the ingredients entered are in upper case.	Works even if ingredients entered are in upper case.	Auto-complete does not work.	Convert user input to lowercase.	2
10	Sorting all recipes with protein does not work properly	Sorted list based on protein values in the order selected	Always sorts in ascending order	Pass in the correct order to the sort function	2
11	Sorting all recipes with calories does not work properly	Sorted list based on calories values in the order selected	Always sorts in descending order	Pass in the correct order to the sort function	2
12	Sorting all recipes with fats does not work properly	Sorted list based on fat values in the order selected	Sorts based on protein values instead	Call appropriate sort function in "fat" case	2
13	Sorting all recipes with sodium does not work	Sorted list based on sodium values in the order selected	Original order is displayed	Call appropriate sort function in "sodium" case	2
14	Sort filters on the allrecipes page are not retained after submission of filters.	Once user sorts recipes the dropdown show the respective sort values until they are changed again	Dropdown always shows "original" and "asc" after submitting sort filters.	Use if-else constructs in flask templating to retain the dropdown values in after submission and change of page.	2
15	In allrecipes page, previous page button works incorrectly for the first page.	Previous page button does not do anything for the first page.	Returns empty list of recipes and app crashes if clicked multiple times.	Add if-else conditions to check for page limits.	2
16	In allrecipes page, next page button works incorrectly for the last page.	Next page button does not do anything for the last page.	Returns empty list of recipes and app crashes if clicked multiple times.	Add if-else conditions to check for page limits.	2

17	Clicking on a recipe in the allrecipes page always opens the next recipe.	Opens the recipe that was clicked on in the allrecipes page.	Opens the next recipe.	Update recipe href. It is off by 1.	1
18	The page number in the all recipe table is not updated	Page number is updated as next/prev is clicked	Page number is always 1	Page number variable needs to be updated on each click	2
19	The home button in all recipe table does not work	Pressing the home button takes the table back to first page	Nothing happens, and same page is displayed	List of recipes should be retrieved with the correct page number.	2
20	Protein, sodium, calories and fat values box is displayed in ML generated recipe	This box is hidden	This box is displayed	Add a check if ML generated option was selected and hide the box	2
21	When no pre-existing recipe is found, an empty page is displayed	An error message is displayed on the recipe template page	An empty page is displayed	Check if returned value is empty, and display error message.	2
22	Chosen ingredients in the pre-existing recipe page are not displayed	Chosen ingredients are displayed	Chosen ingredients are not displayed	Correct list should be returned from the findRecipe function	3
23	Included ingredients in the ML generated page are not displayed	Included ingredients are displayed	Included ingredients are not displayed	Correct list should be returned from the computerGenerated function	3
24	Previous button is cooking mode goes beyond the first step	Hides the last step on display except when there is only one step visible	Hides the one remaining last step also.	Add an if statement checking the presence of only one step	3
25	Next button in cooking mode stops working after 2 clicks	Displays next step until all steps are displayed	Stops working after 2 steps are displayed	Step variable should be updated properly	2
